

October 2018 The Colorado River Indian Tribes is updating the Multi Hazard Mitigation Plan

The intent of the *2018 Colorado River Indian Tribes (CRIT) Multi-Hazard Mitigation Plan* is to ensure our people and property are as safe as possible from the effects of future disasters and that the tribe is eligible for Federal disaster recovery funds following a major disaster. The current Hazard Mitigation Plan is *expired* and must be updated. A planning team made up of representatives from the tribes' departments and adjacent agencies is meeting regularly to update the plan to get CRIT in compliance with the required five-year update of the Plan.

The current Plan focuses on the Reservation's most threatening hazards (flood, severe wind and wildfire) and provides a strategy to reduce or eliminate the risks from those hazards. For the updated Plan, the Planning Team will consider the possibility of including additional hazards should any be identified as a risk to the people and property of the tribe.

The Planning Team anticipates having a draft of the *2018 Colorado River Indian Tribes Multi Hazard Mitigation Plan* later in December of this year, at which time the public will again be provided access to the Plan and the opportunity to comment.

You may view the current Plan from Friday, October 19, 2018 through Monday, November 29, 2018, at the following location(s):

- CRIT Administration Location: Mohave Road & 2nd Avenue
- CRIT Library Location: Mohave Road & 2nd Avenue
- CRIT Senior Center Location: 21074 Mohave Road
- CRIT Homeland Location: 12201 B. Roosevelt Street
- CRIT-nsn.gov The official website for CRIT.
